

First Biochar Conference 2004

Energy & Agricultural Carbon Utilization - sustainable alternatives to sequestration

Conference at the University of Georgia, 10-11 June, 2004

The Energy and Carbon Utilization Symposium held at the University of Georgia June 10-11 2004 brought energy producers and policy makers with agricultural ecologists, soil scientists, engineers and private-sector companies from around the world together. For the first time, the symposium offered a platform to present and discuss findings on sustainable energy and biochar carbon sequestration. Based on the anthropogenic Amazonian dark earths, known as Terra the feasibility of its replication and biochar carbon sequestration was discussed within an interdisciplinary group.
